linkedin.com/in/muhamadfaiz-ibrahim

Selected delivery, operational support, implementation and assessment experience. Projects are grouped by business domain; contribution descriptions retain shared ownership and delivery boundaries.

FINANCE & PAYMENT DATA

PayPal | Germany / Netherlands / WEU

Contributed to API and SFTP-based transaction ingestion; SFTP-to-Blob-to-Snowflake RAW/ODS feeds, reconciliation parity, migration and legacy-feed retirement support. BE/FR/LU expansion was assessed and deferred.

Adyen / GMO / RAT

Adyen terminal-field exposure and timestamp investigation; GMO SFTP secrets, storage and ingestion involvement; RAT successful follow-up payment-rule enhancements.

FIN Navigator / FX / DIME

FIN Navigator Azure feed changes and dormant-task cleanup; FX lineage and migration assessment; DIME SSIS dependency and DailyLoad assessment, closed without migration or rebuild.

LEARNING & WORKFORCE DATA

Adobe ALM / Captivate / IDAM / P2E

Training-event ingestion from Azure Storage into Snowflake RAW/ODS; transcript integration and certification reporting. NL P2E backfill involvement covered investigation and remediation planning.

Tanda / JP Kintai

Workforce ingestion scheduling, Kintai null-value fixes, inactive-user reporting investigation and Tanda side-item mapping assessment.

CUSTOMER, STORE & COMMERCE DATA

Goodays / Critzr / Yext

Goodays outbound assessment and feed correction for 24 Japan-excluded stores; Yext outbound Azure changes. Endpoint cutover, S3 retirement and temporary-closure enhancement remain separate work.

PULSE / OLO / customer platforms

OrderLineCoupons and SMD extract ingestion; regional PULSE merge processing; OLO customer-profile troubleshooting, customer-service updates, customer tags/RFM segments and Taguchi export changes.

Nexus / IDAC / store data

Store-company and bookkeeper relationship reconciliation, data-bloat/synchronisation investigations, JSONL store settings and address exports, stock-event data and store-role linkage involvement.

linkedin.com/in/muhamadfaiz-ibrahim

ADDITIONAL INTEGRATION & PLATFORM INVOLVEMENT

FoodPanda Taiwan | Ongoing implementation

Blob connectivity, Event Grid setup and Snowpipe-driven order ingestion into Snowflake RAW/ODS, with preprocessing, validation and documentation in DEV/acceptance. Production cutover is not represented as complete.

Stats NZ / Turnkey / delivery-platform data

ADF data-share delivery and operational support for Stats NZ; Turnkey procedure and e-invoice export troubleshooting; Uber Eats CSV schema-evolution enhancement and Uber/Deliveroo delivery-fee investigation.

Snowflake / ADF / SSIS modernisation

Managed-identity and key-pair authentication changes; stored-procedure error handling and Snowflake Scripting refactoring; Python runtime updates; warehouse/pipeline analysis; legacy SSIS job retirement and S3-to-Azure migration involvement.

Other shared / earlier assignments

CarParkDelivery, ODS PULSE, OnlineOrdering campaign notifications, GMO Lambda-to-ADF alternative, store opening hours decommission planning, voucher/LVAT cleanup, IBM extractor troubleshooting and Pricing Tool ingestion support.

EFTECH | PETRONAS DATA SECURITY | MAY 2026 - PRESENT

15-system data integration

Concurrent freelance data engineering engagement adapting Microsoft Fabric and integrating data for security reporting across 15 PETRONAS systems.

Fabric / PySpark / Delta

Security issue-log consolidation, source-to-report transformations, data-quality checks and system/table metadata alignment for consistent analytical outputs.

Power BI / DAX / governance reporting

Dashboard development covering security scores, issue/remediation tracking and classification reporting; reconciliation of duplicate records, metric definitions and reporting mappings.

EARLIER PETRONAS ANALYTICS EXPERIENCE

EFTECH / Sigma | PETRONAS Upstream

SQL Server and Oracle integration for Power BI; Upstream Data Control, UDSec and Data Assurance Index reporting; data cleansing, validation and Power Automate workflows.

UTP CeRDaS / PETRONAS Downstream

PETRONAS well-production predictive modelling with an Azure-hosted dashboard; multi-source analysis supporting APC implementation and budget/cost planning during the PETRONAS internship.
